

NAL *Market Deployment Services* *In-market solutions for wireless networks*

Site Development

Your BTS or microwave site materials consolidated into a single site kit made ready for delivery or pick-up.

NAL's Site Development service provides wireless network operators with a supply chain solution that is scalable for local, regional, or national implementations. NAL Worldwide's proven process implementation ensures that your site kit is delivered accurately and on-time. Because, NAL is so confident in our process controls and capabilities this service is *priced and invoiced on a per-site basis.*

Cabinet Assembly

Your BTS or microwave cabinet assembled and pre-tested in our process-controlled configuration center.

NAL's Cabinet Assembly & Test service builds upon our Site Development offering by assembling and testing a BTS or microwave cabinet in an NAL Configuration Center for inclusion in your site kit. Upon completion, our Configuration Center stages the now pre-assembled and pre-tested cabinet for in-market pick-up or delivery.

Delivery & Installation

Your BTS or microwave cabinet delivered, installed and turned-up.

NAL's Delivery & Installation service rounds out our market deployment services by delivering, installing, and turning-up your site cabinet. When coupled with Site Development and Cabinet Assembly, your network receives a seamless end-to-end supply chain and technical services solution. This solution eliminates the complexity and unpredictability of traditional multi-provider in-market approaches.
